

1. What are the most challenging aspect of the coursework task?

Ans=> Due of how different it was from the other questions in the class, this was the part of the assignment that was the hardest. It was a new situation for me, but I ultimately discovered the answer on my own by researching the issue online and viewing instructional videos on YouTube. I eventually understood the Python programming language by working through all the offered practical coursework problems.

2. How did you go about completing the task?

Ans=> I found the work to be challenging. I first struggled to respond to the question. The teacher's explanation of the question in the video that was available on Google Classroom was then clear to me. I started using IDLE to code in Python after seeing the video. I watched it on YouTube till I understood it completely.

3. What have you learned over the course of completing this coursework task?

Ans=> I first studied the logic or operational concepts of Python programming, which covered how programs operate, what their rules are, and how they produce results. In addition, after studying and completing the assignments, I discovered a few mistakes. I was able to do the required tasks more quickly and independently since I was familiar with every subject.
