1. What are the most challenging aspect of the coursework task?

Ans=> This was the assignment's most difficult component since it was so unlike from the other questions in the class. It was a new experience for me, but I eventually figured out the solution on my own by looking up information on websites and watching training videos on YouTube. Working through all the practical coursework issues that were provided helped me gradually comprehend the Python programming language.

2. How did you go about completing the task?

Ans=> The task presented a challenge for me. I had problems answering the question at first. I was then able to understand the question as it was presented by the teacher in the video that was accessible on Google Classroom. After seeing the video, I began coding in Python using IDLE. I looked it up on YouTube till I fully grasped it.

3. What have you learned over the course of completing this coursework task?

Ans=> I initially learnt the python programming logic or operational principles, which included how programs work, what their rules are, and how they generate outcomes. I also realized several errors after studying and doing the tasks. I was able to do the prescribed duties more easily on my own since I understood every subject.
